

# Law Enforcement and Public Health: Patterns of Interaction and Inaction Across the U.S.

*Strategies to Achieve Alignment, Collaboration, and Synergy  
Across Delivery and Financing Systems*

Research-In-Progress Webinar  
June 24, 2020  
12-1pm ET

colorado school of  
**public health**

**Welcome:** Chris Lyttle, JD

*Deputy Director for Systems for Action*

**Presenters:** Glen Mays, PhD

*Department of Health Systems,  
Management & Policy*

*Colorado School of Public Health*

**Q&A:** Moderated by Glen Mays, PhD & Chris Lyttle, JD

# Collaborators

- University of Colorado intramural research team: Mika Hamer, MPH; Kelsey Owsley, MPH; Deena Brosi, MPH; Taryn Quinlan, MPH.
- University of Kansas: Sharla Smith, PhD, MPH
- Virginia Commonwealth University: Michael Preston, PhD, MPH
- Preliminary findings, errors and omissions in today's talk are solely the responsibility of GP Mays

# Motivation

- Persistent examples of unequal treatment, racism and violence in the criminal justice sector
- Even in communities with relatively strong health and social service sectors
- Interorganizational relationships can shape institutional cultures, policies & behaviors
- Stronger connections between law enforcement and local health and social service organizations may help to build cultures and practices that promote health, safety and social justice

# S4A Studies Involving the Criminal Justice Sector

- Arizona: Aligning emergency response systems to improve services for persons with serious mental illness  
<http://systemsforaction.org/projects/financing-and-service-delivery-integration-mental-illness-and-substance-abuse>
- Michigan: Complex care response teams to prevent elder abuse  
<http://systemsforaction.org/projects/testing-community-complex-care-response-team-improve-geriatric-public-health-outcomes>
- Delaware: Multi-sector support teams imbedded in county probation offices  
<http://systemsforaction.org/projects/implementing-culture-health-among-delawares-probation-population>
- Texas: Transformative justice program to reduce recidivism among young adults with felony arrests  
<http://systemsforaction.org/projects/addressing-health-and-social-needs-justice-involved-young-adults>
- Ohio: Regional governing boards to align services for children in families affected by opioid addition <http://systemsforaction.org/projects/using-regional-governing-boards-align-services-rural-children-opioid-crisis>

# How to build delivery & financing systems that improve population health?

- Designed to achieve **large-scale** health improvement: neighborhoods, communities, regions
- Improve means AND reduce variances (**health equity**)
- Target **fundamental** and **multiple** determinants of health
- Mobilize the **collective actions** of multiple sectors and stakeholders in government & private sector
  - Infrastructure
  - Information
  - Incentives

**Systems for Action**  
**National Coordinating Center**  
*Systems and Services Research to Build a Culture of Health*

Mays GP. Governmental public health and the economics of adaptation to population health strategies.

**National Academy of Medicine Discussion Paper.** 2014. <http://nam.edu/wp-content/uploads/2015/06/EconomicsOfAdaptation.pdf>

Discussion

# Questions of interest

- To what extent are law enforcement agencies engaged in community-based networks working to improve health
- How does this engagement vary across communities?
  - - Types of organizations
  - - Types of activities
- How has this engagement changed over time, e.g. in response to protests, reforms
- Does this engagement influence law enforcement behavior, e.g. incarceration, police-involved deaths

# A useful lens for studying multi-sector work

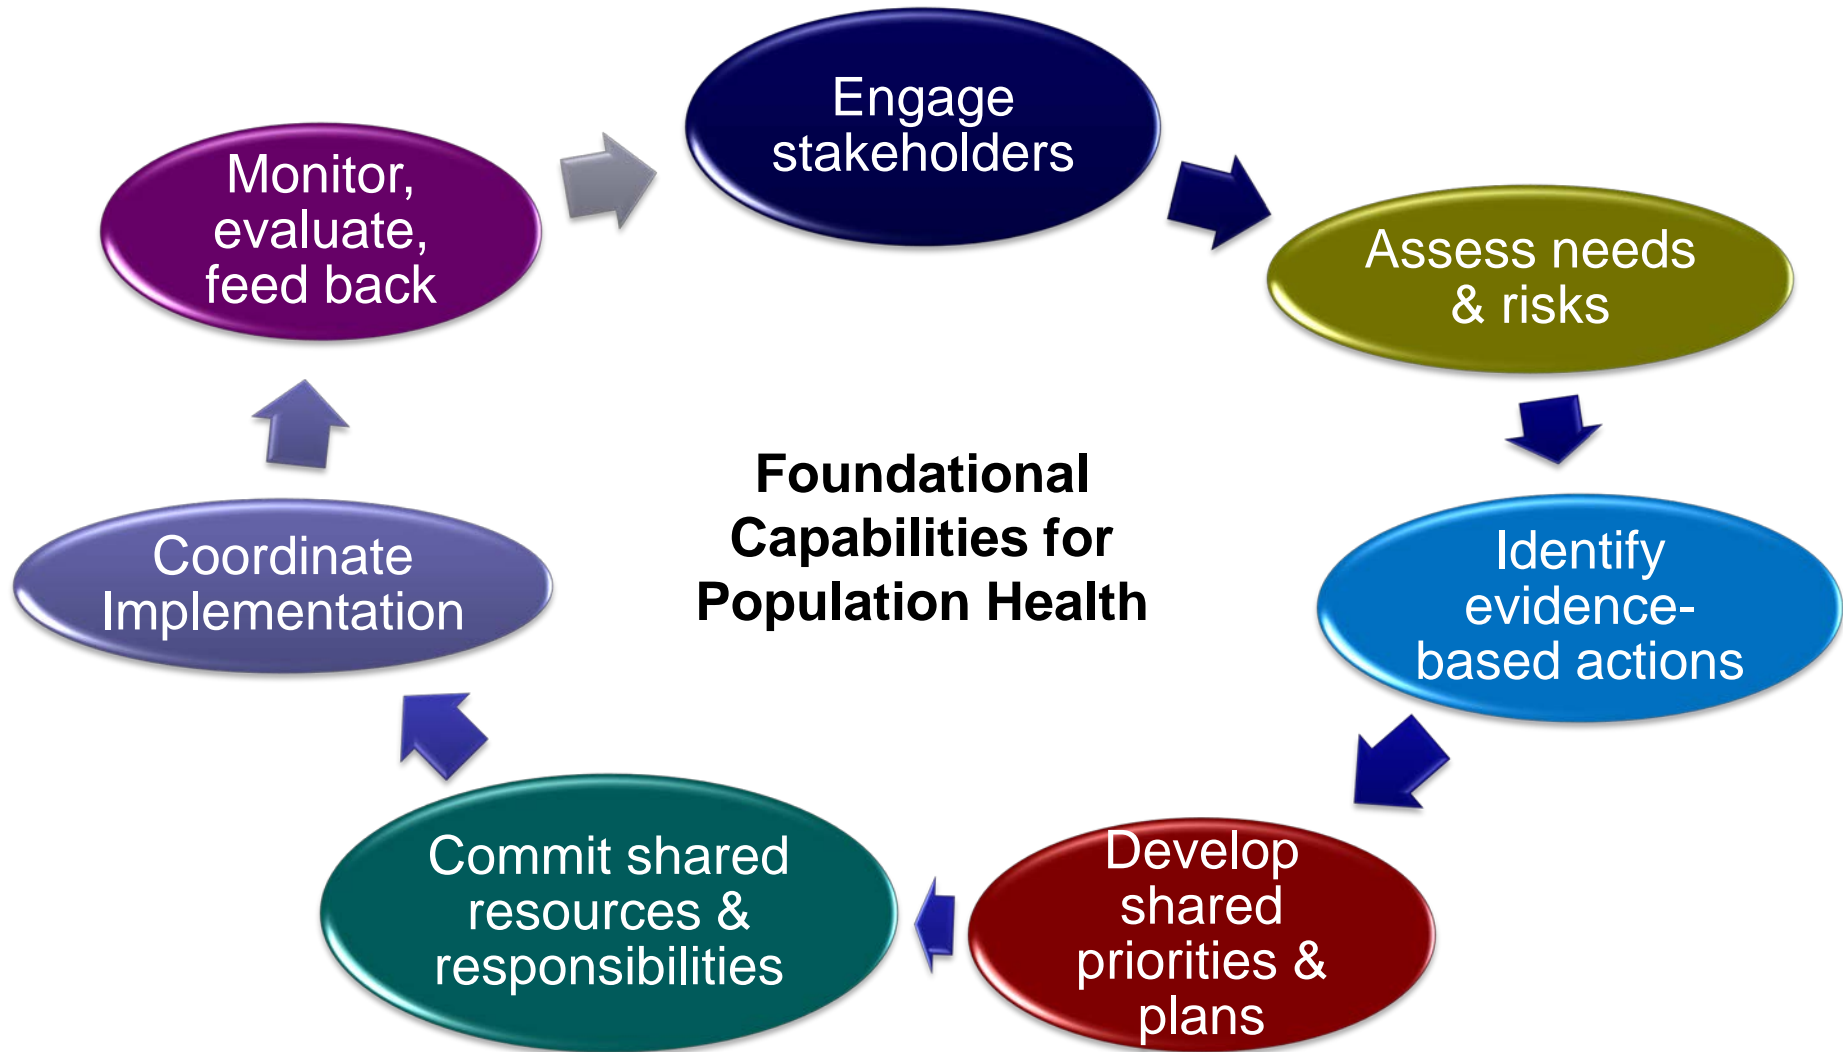

## National Longitudinal Survey of Public Health Systems

- Nationally representative cohort of 600 U.S. communities
- Followed over time: 1998-2018, 2020
- Local public health officials report:
  - **Scope**: availability of 20 recommended population health activities
  - **Network density**: organizations contributing to each activity
  - **Network centrality**: strongest central actor
  - **Quality**: perceived effectiveness of each activity

Law enforcement questions added in 2018

# Widely recommended activities to support multi-sector initiatives in population health

National Academy of Medicine: *For the Public's Health: Investing in a Healthier Future*. Washington, DC: National Academies Press; 2012.

# Data linkages expand analytic possibilities

- **Area Health Resource File**: health resources, demographics, socioeconomic status, insurance coverage
- **Association data**: public health agency institutional and financial characteristics
- **CMS Impact File & Cost Report**: hospital ownership, market share, uncompensated care
- **Dartmouth Atlas**: Area-level medical spending (Medicare)
- **CDC Compressed Mortality File**: Cause-specific death rates by county
- **Equality of Opportunity Project (Chetty)**: local estimates of life expectancy by income
- **Incarceration rates**: Vera Institute of Justice
- **Police-involved deaths**: NVDRS, Mapping Police Violence

# Measuring system structure

- Two-mode networks (organization types X activities) transformed to one-mode networks with **tie strength** indicated by number of activities jointly produced

Organization Type/Sector	Activities							
	1	2	3	4	5	6	7	...20
Local public health agency	X	X		X		X		
State public health agency		X	X		X			X
Hospitals		X	X	X			X	
Physician practices					X		X	
CHCs	X		X		X			
Insurers					X	X		X
Employers								
Social service organizations		X		X			X	
Schools			X		X	X		
.....								

# Mapping delivery systems for public health

**Node size = degree centrality**

**Line size = % activities jointly contributed (tie strength)**

Mays GP et al. Understanding the organization of public health delivery systems: an empirical typology.

*Milbank Q.* 2010;88(1):81–111.

# Measures of Law Enforcement Network Engagement

- **Extensive margin:** % communities with law enforcement engaged in at least 1 recommended activity
- **Intensive margin:** % of activities in which law enforcement is involved
- **Network connectivity:** degree centrality of law enforcement
- **Tie strength:** % of activities jointly contributed by law enforcement and other organizations, by sector

# Law Enforcement Engagement in Health Activities, 2018

## Population Health Activities

	<u>Overall</u>	<u>Urban</u>	<u>Rural</u>
1. Assess community health needs	17.4%	24.7%	13.6% **
2. Survey community for behavioral risk factors	10.1%	16.4%	4.7% **
3. Investigate adverse health events	27.0%	36.5%	22.7% **
4. Conduct lab testing for health investigations	24.1%	31.5%	18.4% **
5. Analyze determinants of health	9.5%	14.3%	7.1% **
6. Analyze preventive services use	10.2%	17.5%	5.5% **
7. Maintain communications network of health orgs	14.8%	20.6%	12.5% **
8. Provide health information to public officials	17.2%	23.1%	15.2% **
9. Provide health information to the public	9.7%	12.3%	8.3%
10. Provide health information to the media	10.1%	11.8%	7.9%
11. Prioritize community health needs	15.6%	19.7%	14.5%
12. Implement interventions based on priorities	11.8%	15.7%	10.6%
13. Develop community health action plan	7.2%	13.3%	4.0% **
14. Develop community resource allocation plan	4.2%	7.5%	1.2% **
15. Deploy resources based on community plan	10.5%	14.3%	9.2%
16. Assess local public health agency capabilities	6.0%	8.8%	4.8%
17. Link people to needed health and social services	5.5%	9.0%	4.0%
18. Evaluate impact of programs on health	6.3%	9.6%	5.3%
19. Conduct program monitoring and QI	5.3%	9.6%	3.2% **
Intensive margin: % activities performed	12.3%	17.5%	9.6% **
Extensive margin: % communities with 1 or more activities	43.9%	55.4%	35.8% **
Degree centrality	5.9%	8.5%	4.2% **

# Law Enforcement Engagement in Health Activities, 2018

## Percent Activities Performed (Intensive Margin)

## Network Connectivity (Degree Centrality)

# Law Enforcement Connectivity with Other Sectors, 2018

Motivation

Approach

Results

Discussion

# Preliminary lessons learned

- Wide variation in law enforcement engagement in local community health networks
- Extensive margin of engagement is moderate compared to other sectors
- Intensive margin of engagement is lower than many other sectors
- Engagement is significantly lower in rural communities

# Next steps in this research

- Multivariate analysis to examine socioeconomic, demographic, and organizational correlates of variation
- Data linkage with local estimates of law enforcement events: incarceration, police-involved deaths
- Explore cross-sectional patterns & associations
- Collect 2020 data, explore patterns of change between 2018-2020
- Data linkage with information on protests, law enforcement reforms
- Explore longitudinal associations using difference-in-difference analysis

# Questions?

\$1 million is available for research investigating the effectiveness of existing, currently operating system alignment mechanisms in mitigating social, economic and health disruptions associated with the COVID-19 pandemic. Applications must leverage ongoing or recently completed research on the system alignment mechanism of interest. Proposals due August 5, 2020.

## CALL FOR PROPOSALS INFORMATIONAL WEBINAR

**Monday, July 6  
12pm ET**

# Certificate of Completion

If you would like to receive a  
**certificate of completion**  
for today's ResProg webinar, please  
complete the survey at the end of the session.

One will be emailed to you.

# Upcoming Webinars

**July 8 | 12 pm ET**

## [Aligning Health and Social Systems to Expand Evidence-Based Home-Visiting](#)

*Gregory Tung, PhD, Mandy Allison, MD and Venice Williams, PhD*

*University of Colorado Denver*

**July 22 | 12 pm ET**

## [Transit and Treatment: Effectiveness of Transit System to Improve Substance Abuse and Mental Health in Connecticut](#)

*Jeffrey P. Cohen, PhD and Carla J. Rash, PhD*

*University of Connecticut*
